

Mouse Activin Receptor Like Kinase 1 ELISA Kit | ALK1 elisa kit

Mouse Activin Receptor Like Kinase 1 ELISA Kit

CATALOG # AAA85120	REACTIVITY Mouse
------------------------------	----------------------------

PRODUCT SYNONYMS

Activin Receptor Like Kinase 1; Mouse Activin Receptor Like Kinase 1 ELISA Kit; ALK1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	0.5-10ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ALK1 elisa kit	Intended Uses: This ALK1 ELISA kit is intended Laboratory for research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of ALK1 in the sample, this ALK1 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus ALK1 concentration. The concentration of ALK1 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Principle of the Assay: This ALK1 enzyme linked immunosorbent assay applies a technique called a quantitative sandwich immunoassay. The microtiter plate provided in this kit has been pre-coated with a monoclonal antibody specific for ALK1. Standards or samples are then added to the microtiter plate wells and ALK1 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of ALK1 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for ALK1 are added to each well to "sandwich" the ALK1 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, A and B substrate solution is added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain ALK1 and enzyme-conjugated antibody will exhibit a change in colour. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the colour change is measured spectrophotometrically at a wavelength of 450 nm.
Product Categories/Family for ALK1 elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	2228562
NCBI GeneID	94
Molecular Weight	56,124 Da
NCBI Official Full Name	activin receptor like kinase 1
NCBI Official Synonym Full Names	activin A receptor type II-like 1
NCBI Official Symbol	ACVRL1
NCBI Official Synonym Symbols	HHT; ALK1; HHT2; ORW2; SKR3; ALK-1; TSR-I; ACVRLK1
NCBI Protein Information	serine/threonine-protein kinase receptor R3; TGF-B superfamily receptor type I; activin A receptor, type II-like kinase 1
UniProt Protein Name	Serine/threonine-protein kinase receptor R3
UniProt Gene Name	ACVRL1
UniProt Synonym Gene Names	ACVRLK1; ALK1; SKR3; ALK-1; TSR-I
UniProt Entry Name	ACVL1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
