

Human Oncogene protein p190/bcr abl ELISA Kit | Oncogene protein p190/bcr abl elisa kit

Human Oncogene protein p190/bcr abl ELISA Kit

CATALOG #
AAA85272

REACTIVITY
Human

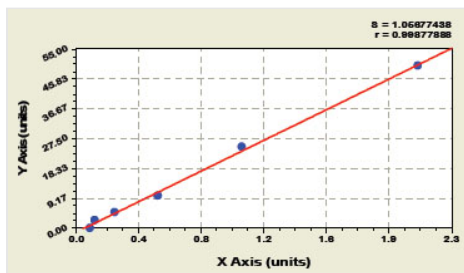

PRODUCT SYNONYMS

Oncogene protein p190/bcr abl; Human Oncogene protein p190/bcr abl ELISA Kit; Oncogene protein p190/bcr abl elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This P190 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human P190. This ELISA kit for research use only, not for therapeutic applications
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the assay: P190 ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for P190. Standards or samples are then added to the microtiter plate wells and P190 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of P190 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for P190 are added to each well to "sandwich" the P190 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain P190 and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The P190 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
