

Rabbit Mammary carcinoma Marker ELISA Kit | CA153 elisa kit

Rabbit Mammary carcinoma Marker ELISA Kit

CATALOG #
AAA85363

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Mammary carcinoma Marker; Rabbit Mammary carcinoma Marker ELISA Kit; CA153 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This CA153 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit CA153. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CA153 elisa kit

Principle of the Assay: CA153 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CA153 antibody and an CA153-HRP conjugate. The assay sample and buffer are incubated together with CA153-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CA153 concentration since CA153 from samples and CA153-HRP conjugate compete for the anti-CA153 antibody binding site. Since the number of sites is limited, as more sites are occupied by CA153 from the sample, fewer sites are left to bind CA153-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CA153 concentration in each sample is interpolated from this standard curve.
