

## Rabbit Soluble Intercellular Adhesion Molecule-1 ELISA Kit | SICAM1 elisa kit

Rabbit Soluble Intercellular Adhesion Molecule-1 ELISA Kit

CATALOG #  
**AAA85493**

REACTIVITY  
**Rabbit**

### PRODUCT SYNONYMS

Soluble Intercellular Adhesion Molecule-1; Rabbit Soluble Intercellular Adhesion Molecule-1 ELISA Kit; SICAM1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rabbit                                                                                                                                                                                        |
| Samples                 | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate                                                                                                                    |
| Assay Type              | Competitive or Sandwich                                                                                                                                                                       |
| Detection Range         | 0.5-10ng/mL                                                                                                                                                                                   |
| Sensitivity             | 0.1ng/mL                                                                                                                                                                                      |
| Intended Uses           | This sICAM-1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit sICAM-1. This ELISA kit for research use only, not for therapeutic applications! |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                                                                                           |

### ADDITIONAL INFORMATION

#### Related Product Information for SICAM1 elisa kit

**Principle of the assay:** sICAM-1 ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for sICAM-1. Standards or samples are then added to the microtiter plate wells and sICAM-1 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of sICAM-1 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for sICAM-1 are added to each well to "sandwich" the sICAM-1 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain sICAM-1 and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The sICAM-1 concentration in each sample is interpolated from this standard curve.

#### Product Categories/Family for SICAM1 elisa kit

Immunology

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
