

Rat Protein C ELISA Kit | ProC elisa kit

Rat Protein C ELISA Kit

CATALOG #
AAA85786

REACTIVITY
Rat

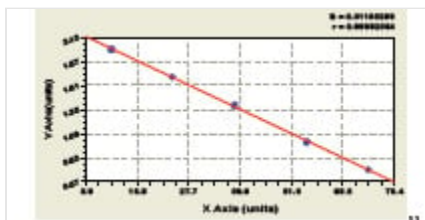

PRODUCT SYNONYMS

Protein C; Rat Protein C ELISA Kit; ProC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	5.0-100 ng/mL
Sensitivity	1.0ng/ml
Intended Uses	This PC ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PC. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ProC elisa kit

Principle of the assay: PC ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PC antibody and an PC-HRP conjugate. The assay sample and buffer are incubated together with PC-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PC concentration since PC from samples and PC-HRP conjugate compete for the anti-PC antibody binding site. Since the number of sites is limited, as more sites are occupied by PC from the sample, fewer sites are left to bind PC-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PC concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #

147829653

NCBI GeneID	5173415
NCBI Official Full Name	proC
NCBI Official Symbol	proC
NCBI Protein Information	proC; hypothetical protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
