

Human Phospho Tou protein ELISA Kit | Pr elisa kit

Human Phospho Tou protein ELISA Kit

CATALOG #
AAA85787

REACTIVITY
Human

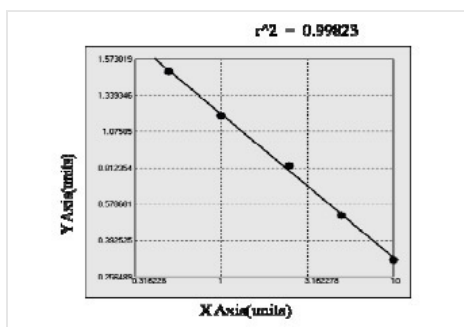

PRODUCT SYNONYMS

Phospho Tou protein; Human Phospho Tou protein ELISA Kit; Pr elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TUSC2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human TUSC2. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Pr elisa kit

Principle of the assay: TUSC2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TUSC2 antibody and an TUSC2-HRP conjugate. The assay sample and buffer are incubated together with TUSC2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TUSC2 concentration since TUSC2 from samples and TUSC2-HRP conjugate compete for the anti-TUSC2 antibody binding site. Since the number of sites is limited, as more sites are occupied by TUSC2 from the sample, fewer sites are left to bind TUSC2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TUSC2 concentration in each sample is interpolated from this standard curve.

Product Categories/Family for Pr elisa kit

Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
