

Human Cysteinyl leukotrienes ELISA Kit | CysLTs elisa kit

Human Cysteinyl leukotrienes ELISA Kit

CATALOG #
AAA86157

REACTIVITY
Human

PRODUCT SYNONYMS

Cysteinyl leukotrienes; Human Cysteinyl leukotrienes ELISA Kit; CysLTs elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of CYSL. No significant cross-reactivity or interference between CYSL and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CYSL and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CysLTs elisa kit	Principle of the Assay: CYSL ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CYSL antibody and an CYSL-HRP conjugate. The assay sample and buffer are incubated together with CYSL-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CYSL concentration since CYSL from samples and CYSL-HRP conjugate compete for the anti-CYSL antibody binding site. Since the number of sites is limited, as more sites are occupied by CYSL from the sample, fewer sites are left to bind CYSL-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CYSL concentration in each sample is interpolated from this standard curve. Intended Uses: This CYSL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human CYSL. This ELISA kit for research use only, not for therapeutic or test applications!
--	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
