

Mouse Collagen Type VIII Alpha 1 ELISA Kit | COL8a1 elisa kit

Mouse Collagen Type VIII Alpha 1 ELISA Kit

CATALOG #
AAA86204

REACTIVITY
Mouse

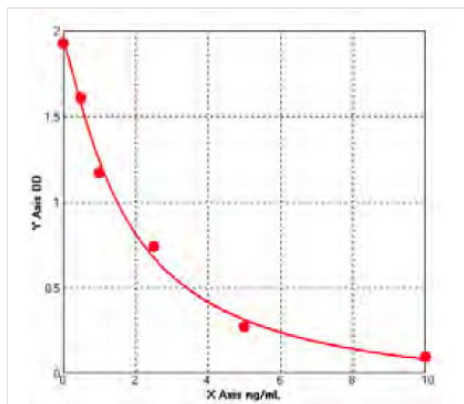

PRODUCT SYNONYMS

Collagen Type VIII Alpha 1; Mouse Collagen Type VIII Alpha 1 ELISA Kit; COL8a1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of COL8alpha1. No significant cross-reactivity or interference between COL8alpha1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between COL8alpha1 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for COL8a1 elisa kit	Intended Uses: This COL8alpha1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse COL8alpha1. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: COL8alpha1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-COL8alpha1 antibody and an COL8alpha1-HRP conjugate. The assay sample and buffer are incubated together with COL8alpha1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the COL8alpha1 concentration since COL8alpha1 from samples and COL8alpha1-HRP conjugate compete for the anti-COL8alpha1 antibody binding site. Since the number of sites is limited, as more sites are occupied by COL8alpha1 from the sample, fewer sites are left to bind COL8alpha1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The COL8alpha1 concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15488904
NCBI GeneID	1295
Molecular Weight	73,364 Da
NCBI Official Full Name	Collagen, type VIII, alpha 1
NCBI Official Synonym Full Names	collagen, type VIII, alpha 1
NCBI Official Symbol	COL8A1
NCBI Official Synonym Symbols	C3orf7
NCBI Protein Information	collagen alpha-1(VIII) chain; collagen alpha-1(VIII) chain; smag-64; endothelial collagen; collagen VIII, alpha-1 polypeptide; cell proliferation-inducing protein 41; smooth muscle cell-expressed and macrophage conditioned medium-induced protein smag-64
UniProt Protein Name	Collagen alpha-1(VIII) chain
UniProt Gene Name	COL8A1
UniProt Synonym Gene Names	C3orf7
UniProt Entry Name	CO8A1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
