

Human Hirudin ELISA Kit | HRD elisa kit

Human Hirudin ELISA Kit

CATALOG #
AAA86536

REACTIVITY
Human

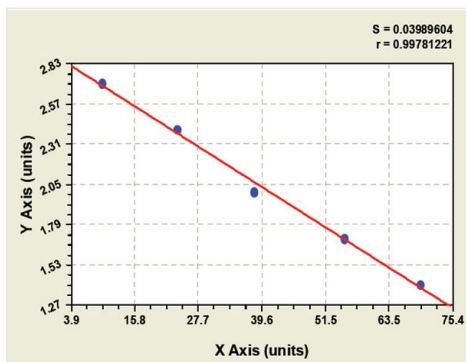

PRODUCT SYNONYMS

Hirudin; Human Hirudin ELISA Kit; HRD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	10-250ng/mL
Sensitivity	1.0ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HRD elisa kit	For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate INTENDED USE This HRD ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human HRD. This ELISA kit for research use only! PRINCIPLE OF THE ASSAY HRD ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-HRD antibody and an HRD-HRP conjugate. The assay sample and buffer are incubated together with HRD-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HRD concentration since HRD from samples and HRD-HRP conjugate compete for the anti-HRD antibody binding site. Since the number of sites is limited, as more sites are occupied by HRD from the sample, fewer sites are left to bind HRD-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HRD concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1568248
NCBI Official Full Name	hirudin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
