

Mouse Glycated hemoglobin A1c ELISA Kit | GHbA1c elisa kit

Mouse Glycated hemoglobin A1c ELISA Kit

CATALOG #
AAA86607

REACTIVITY
Mouse

PRODUCT SYNONYMS

Glycated hemoglobin A1c; Mouse Glycated hemoglobin A1c ELISA Kit; GHbA1c elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of HbA1c. No significant cross-reactivity or interference between HbA1c and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between HbA1c and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ug/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GHbA1c elisa kit	Intended Uses: This HbA1c ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse HbA1c. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: HbA1c ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-HbA1c antibody and an HbA1c-HRP conjugate. The assay sample and buffer are incubated together with HbA1c-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HbA1c concentration since HbA1c from samples and HbA1c-HRP conjugate compete for the anti-HbA1c antibody binding site. Since the number of sites is limited, as more sites are occupied by HbA1c from the sample, fewer sites are left to bind HbA1c-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HbA1c concentration in each sample is interpolated from this standard curve.
Product Categories/Family for GHbA1c elisa kit	Cardiovascular

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
