

Human Anti beta2 Glycoprotein1 Antibody ELISA Kit | beta2GP1Ab elisa kit

Human Anti beta2 Glycoprotein1 Antibody ELISA Kit

CATALOG #
AAA86690

REACTIVITY
Human

PRODUCT SYNONYMS

Anti beta2 Glycoprotein1 Antibody; Human Anti beta2 Glycoprotein1 Antibody ELISA Kit; Human Anti b2 Glycoprotein1 Antibody ELISA Kit; beta2GP1Ab elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	5.0-100ng/mL
Sensitivity	1.0ng/mL
Intended Uses	This Anti-beta2GP1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human Anti-beta2GP1. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the Assay: Anti-beta2GP1 ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with beta2-Glycoprotein 1 Antigen. Standards or samples are then added to the microtiter plate wells and Anti-beta2GP1 if present, will bind to the antigen pre-coated wells. In order to quantitatively determine the amount of Anti-beta2GP1 present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated beta2-Glycoprotein 1 Antigen is added to each well to "sandwich" the Anti-beta2GP1 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain Anti-beta2GP1 and enzyme-conjugated antigen will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-beta2GP1 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
