

Mouse ds Deoxyribonucleic Acid Antibody ELISA Kit | dsDNA.Ab elisa kit

Mouse ds Deoxyribonucleic Acid Antibody ELISA Kit

CATALOG #
AAA86840

REACTIVITY
Mouse

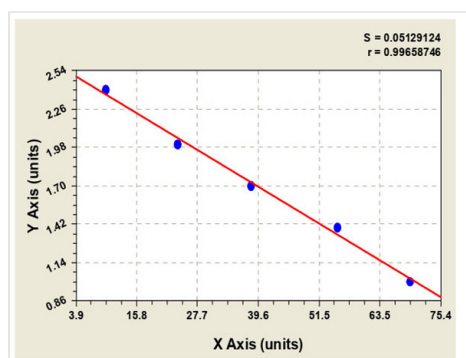

PRODUCT SYNONYMS

ds Deoxyribonucleic Acid Antibody; Mouse ds Deoxyribonucleic Acid Antibody ELISA Kit; dsDNA.Ab elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of ds-DNA-Ab. No significant cross-reactivity or interference between ds-DNA-Ab and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ds-DNA-Ab and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Highest Standards	100ng/mL
Concentration of Standards	Concentration of Standards
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for dsDNA.Ab elisa kit	Principle of the Assay: Ds-DNA-Ab ELISA kit applies the competitive enzyme immunoassay technique utilizing a ds-DNA antigen and a ds-DNA-Ab-HRP conjugate. The assay sample and buffer are incubated together with ds-DNA-Ab-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ds-DNA-Ab concentration since ds-DNA-Ab from samples and ds-DNA-Ab-HRP conjugate compete for the ds-DNA antigen binding site. Since the number of sites is limited, as more sites are occupied by ds-DNA-Ab from the sample, fewer sites are left to bind ds-DNA-Ab-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ds-DNA-Ab concentration in each sample is interpolated from this standard curve. Intended Uses: This ds-DNA-Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse ds-DNA-Ab. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for dsDNA.Ab elisa kit	Epigenetics and Nuclear Signaling

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
