

Rat Liver glycogen ELISA Kit | LGC elisa kit

Rat Liver glycogen ELISA Kit

CATALOG #
AAA86845

REACTIVITY
Rat

PRODUCT SYNONYMS

Liver glycogen; Rat Liver glycogen ELISA Kit; LGC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LGC elisa kit

Intended Uses: This LF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine LF. This ELISA kit for research use only!

Principle of the Assay: LF ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-LF antibody and an LF-HRP conjugate. The assay sample and buffer are incubated together with LF-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LF concentration since LF from samples and LF-HRP conjugate compete for the anti-LF antibody binding site. Since the number of sites is limited, as more sites are occupied by LF from the sample, fewer sites are left to bind LF-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LF concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2632187
NCBI Official Full Name	IgA, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
