

Guinea Pig Hepatocyte Nuclear Factor 6 Alpha ELISA Kit | HNF6alpha elisa kit

Guinea pig Hepatocyte Nuclear Factor 6 Alpha ELISA Kit

CATALOG #
AAA86850

REACTIVITY
Guinea Pig

PRODUCT SYNONYMS

Hepatocyte Nuclear Factor 6 Alpha; Guinea pig Hepatocyte Nuclear Factor 6 Alpha ELISA Kit; HNF6alpha elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Guinea Pig
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HNF6alpha elisa kit

Intended Uses: This HNF6a ELISA kit is intended Laboratory for research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HNF6a in the sample, this HNF6a ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HNF6a concentration. The concentration of HNF6a in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Principle of the Assay: This HNF6a enzyme linked immunosorbent assay applies a technique called a quantitative sandwich immunoassay. The microtiter plate provided in this kit has been pre-coated with a monoclonal antibody specific for HNF6a. Standards or samples are then added to the microtiter plate wells and HNF6a if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of HNF6a present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for HNF6a are added to each well to "sandwich" the HNF6a immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, A and B substrate solution is added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain HNF6a and enzyme-conjugated antibody will exhibit a change in colour. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the colour change is measured spectrophotometrically at a wavelength of 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4100316
NCBI GeneID	3175
Molecular Weight	51,023 Da
NCBI Official Full Name	hepatocyte nuclear factor-6 alpha
NCBI Official Synonym Full Names	one cut homeobox 1
NCBI Official Symbol	ONECUT1
NCBI Official Synonym Symbols	HNF6; HNF-6; HNF6A
NCBI Protein Information	hepatocyte nuclear factor 6; one cut domain family member 1; hepatocyte nuclear factor 6, alpha
UniProt Protein Name	Hepatocyte nuclear factor 6
UniProt Gene Name	ONECUT1
UniProt Synonym Gene Names	HNF6; HNF6A; HNF-6
UniProt Entry Name	HNF6_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
