

Mouse dystrophin ELISA Kit | Dystrophin elisa kit

Mouse dystrophin ELISA Kit

CATALOG #
AAA86916

REACTIVITY
Mouse

PRODUCT SYNONYMS

dystrophin; Mouse dystrophin ELISA Kit; Mouse dystrophin (Dystrophin) ELISA Kit; dystrophin (Mouse); Dystrophin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Intended Uses: This DSG1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine DSG1. This ELISA kit for research use only!

Principle of the Assay: DSG1 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-DSG1 antibody and an DSG1-HRP conjugate. The assay sample and buffer are incubated together with DSG1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the DSG1 concentration since DSG1 from samples and DSG1-HRP conjugate compete for the anti-DSG1 antibody binding site. Since the number of sites is limited, as more sites are occupied by DSG1 from the sample, fewer sites are left to bind DSG1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The DSG1 concentration in each sample is interpolated from this standard curve.
