

## Mouse Pregnancy associated plasma protein A ELISA Kit | PAPP-A elisa kit

Mouse Pregnancy associated plasma protein A ELISA Kit

CATALOG #  
**AAA87088**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Pregnancy associated plasma protein A; Mouse Pregnancy associated plasma protein A ELISA Kit; PAPP-A elisa kit

### PRODUCT SPECIFICATIONS

|                            |                                                                            |
|----------------------------|----------------------------------------------------------------------------|
| Reactivity                 | Mouse                                                                      |
| Samples                    | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate |
| Assay Type                 | Competitive                                                                |
| Detection Range            | 0.5-10ng/mL                                                                |
| Sensitivity                | 0.1ng/mL                                                                   |
| Highest Standards          | 10ng/mL                                                                    |
| Concentration of Standards | Concentration of Standards                                                 |
| Preparation and Storage    | Store all reagents at 2-8 degree C.                                        |

### NCBI AND UNIPROT INFORMATION

|                         |                                                |
|-------------------------|------------------------------------------------|
| NCBI GI #               | 71025082                                       |
| Molecular Weight        | 23,055 Da                                      |
| NCBI Official Full Name | pregnancy associated plasma protein A, partial |
| UniProt Protein Name    | Pregnancy associated plasma protein A          |
| UniProt Entry Name      | Q45XF7_PIG                                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
