

Human Anti Ganglioside T1b Antibody ELISA Kit | GT1b elisa kit

Human Anti Ganglioside T1b Antibody ELISA Kit

CATALOG #
AAA87157

REACTIVITY
Human

PRODUCT SYNONYMS

Anti Ganglioside T1b Antibody; Human Anti Ganglioside T1b Antibody ELISA Kit; GT1b elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GT1b elisa kit

Intended Uses: This GT ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine GT. This ELISA kit for research use only!

Principle of the Assay: GT ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GT antibody and an GT-HRP conjugate. The assay sample and buffer are incubated together with GT-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GT concentration since GT from samples and GT-HRP conjugate compete for the anti-GT antibody binding site. Since the number of sites is limited, as more sites are occupied by GT from the sample, fewer sites are left to bind GT-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GT concentration in each sample is interpolated from this standard curve.
