

Human Orexin A ELISA Kit | OX A elisa kit

Human Orexin A ELISA Kit

CATALOG #
AAA87269

REACTIVITY
Human

PRODUCT SYNONYMS

Orexin A; Human Orexin A ELISA Kit; OX A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	5.0-100ng/mL
Sensitivity	1.0ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This OX-A ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human OX-A. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY OX-A ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-OX-A antibody and an OX-A-HRP conjugate. The assay sample and buffer are incubated together with OX-A-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the OX-A concentration since OX-A from samples and OX-A-HRP conjugate compete for the anti-OX-A antibody binding site. Since the number of sites is limited, as more sites are occupied by OX-A from the sample, fewer sites are left to bind OX-A-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The OX-A concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4557635
NCBI GeneID	3060
NCBI Accession #	NP_001515.1
NCBI GenBank Nucleotide #	NM_001524.1
Molecular Weight	13,363 Da
NCBI Official Full Name	orexin
NCBI Official Synonym Full Names	hypocretin (orexin) neuropeptide precursor
NCBI Official Symbol	HCRT
NCBI Official Synonym Symbols	OX; PPOX; NRCLP1
NCBI Protein Information	orexin; prepro-orexin
UniProt Protein Name	Orexin
UniProt Gene Name	HCRT
UniProt Synonym Gene Names	OX; PPORX; PPOX; Hcrt; Hcrt1; Hcrt2
UniProt Entry Name	OREX_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
