

Rat Bone-specific Alkphase B ELISA Kit | ALP-B elisa kit

Rat Bone-specific Alkphase B ELISA Kit

CATALOG #
AAA87321

REACTIVITY
Rat

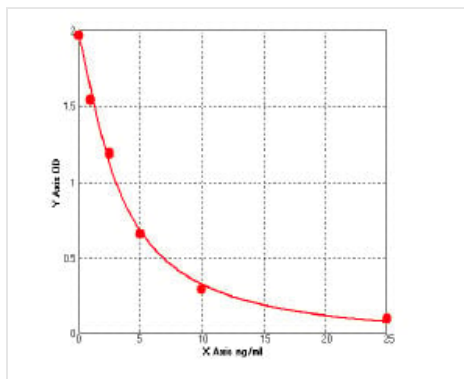

PRODUCT SYNONYMS

Bone-specific Alkphase B; Rat Bone-specific Alkphase B ELISA Kit; Bone-specific Alkphase B (Rat); ALP-B elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of BALPB. No significant cross-reactivity or interference between BALPB and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between BALPB and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for ALP-B elisa kit	Principle of the Assay: BALPB ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-BALPB antibody and an BALPB-HRP conjugate. The assay sample and buffer are incubated together with BALPB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the BALPB concentration since BALPB from samples and BALPB-HRP conjugate compete for the anti-BALPB antibody binding site. Since the number of sites is limited, as more sites are occupied by BALPB from the sample, fewer sites are left to bind BALPB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The BALPB concentration in each sample is interpolated from this standard curve. Intended Uses: This BALPB ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat BALPB. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	178462
NCBI GeneID	249
UniProt Accession #	P05186; O75090; Q2TAI7; Q59EJ7; Q5BKZ5; Q5VTG5; Q6NZI8; Q8WU32; A1A4E7; B2RMP8; B7Z387; B7Z4Y6
Molecular Weight	57,305 Da
NCBI Official Full Name	alkaline phosphatase
NCBI Official Synonym Full Names	alkaline phosphatase, liver/bone/kidney
NCBI Official Symbol	ALPL
NCBI Official Synonym Symbols	HOPS; TNAP; APTNAP; TNSALP; AP-TNAP
NCBI Protein Information	alkaline phosphatase, tissue-nonspecific isozyme; glycerophosphatase; tissue-nonspecific ALP; alkaline phosphomonoesterase; liver/bone/kidney-type alkaline phosphatase; alkaline phosphatase liver/bone/kidney isozyme
UniProt Protein Name	Alkaline phosphatase, tissue-nonspecific isozyme
UniProt Gene Name	ALPL
UniProt Synonym Gene Names	AP-TNAP; TNSALP
UniProt Entry Name	PPBT_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
