

Human Growth Hormone Binding Protein ELISA Kit | GHBP elisa kit

Human Growth Hormone Binding Protein ELISA Kit

CATALOG #
AAA87600

REACTIVITY
Human

PRODUCT SYNONYMS

Growth Hormone Binding Protein; Human Growth Hormone Binding Protein ELISA Kit; GHBP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	50-1000 pmol/mL
Sensitivity	1.0pmol/mL
Intended Uses	This GC ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human GC. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GHBP elisa kit

Principle of the Assay: GC ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for GC. Standards or samples are then added to the microtiter plate wells and GC if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of GC present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated polyclonal antibody, specific for GC are added to each well to "sandwich" the GC immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain GC and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GC concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	27806879
NCBI GeneID	280802
NCBI Accession #	NP_776341.1
NCBI GenBank Nucleotide #	NM_173916.3
Molecular Weight	20,944 Da
NCBI Official Full Name	glucagon
NCBI Official Synonym Full Names	glucagon<
NCBI Official Symbol	GCG
NCBI Protein Information	glucagon
UniProt Protein Name	Glucagon
UniProt Gene Name	GCG
UniProt Synonym Gene Names	GRPP; OXM; OXY; GLP-1; GLP-1(7-37); GLP-1(7-36); GLP-2
UniProt Entry Name	GLUC_BOVIN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
