

GuineaPig Hyaluronate binding protein ELISA Kit | HABP elisa kit

Guinea Pig Hyaluronate binding protein ELISA Kit

CATALOG #
AAA87630

REACTIVITY
GuineaPig

PRODUCT SYNONYMS

Hyaluronate binding protein; Guinea Pig Hyaluronate binding protein ELISA Kit; Hyaluronate binding protein (Guinea Pig); HABP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	GuineaPig
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for HABP elisa kit

Intended Uses: This HABP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Guinea pig HABP.

Principle of the Assay: HABP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-HABP antibody and an HABP-HRP conjugate. The assay sample and buffer are incubated together with HABP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HABP concentration since HABP from samples and HABP-HRP conjugate compete for the anti-HABP antibody binding site. Since the number of sites is limited, as more sites are occupied by HABP from the sample, fewer sites are left to bind HABP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HABP concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	26051243
NCBI GeneID	7130
NCBI Accession #	NP_009046.2
NCBI GenBank Nucleotide #	NM_007115.3
UniProt Accession #	P98066; Q53TI7; Q8WWI9
Molecular Weight	31,203 Da
NCBI Official Full Name	tumor necrosis factor-inducible gene 6 protein
NCBI Official Synonym Full Names	tumor necrosis factor, alpha-induced protein 6
NCBI Official Symbol	TNFAIP6
NCBI Official Synonym Symbols	TSG6; TSG-6
NCBI Protein Information	tumor necrosis factor-inducible gene 6 protein; TNF alpha-induced protein 6; hyaluronate-binding protein; TNF-stimulated gene 6 protein; tumor necrosis factor alpha-inducible protein 6; tumor necrosis factor-stimulated gene-6 protein
UniProt Protein Name	Tumor necrosis factor-inducible gene 6 protein
UniProt Gene Name	TNFAIP6
UniProt Synonym Gene Names	TSG6; TSG-6
UniProt Entry Name	TSG6_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
