

Canine Tau Protein ELISA Kit | Tau elisa kit

Canine Tau Protein ELISA Kit

CATALOG #
AAA88101

REACTIVITY
Canine

PRODUCT SYNONYMS

Tau Protein; Canine Tau Protein ELISA Kit; Tau elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of TAU. No significant cross-reactivity or interference between TAU and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between TAU and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Tau elisa kit	Principle of the Assay: TAU ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-TAU antibody and an TAU-HRP conjugate. The assay sample and buffer are incubated together with TAU-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TAU concentration since TAU from samples and TAU-HRP conjugate compete for the anti-TAU antibody binding site. Since the number of sites is limited, as more sites are occupied by TAU from the sample, fewer sites are left to bind TAU-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TAU concentration in each sample is interpolated from this standard curve. Intended Uses: This TAU ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine TAU. This ELISA kit for research use only, not for therapeutic or test applications!
