

Goat Total Epidermal Growth Factor ELISA Kit | EGF elisa kit

Goat Total Epidermal Growth Factor ELISA Kit

CATALOG #
AAA88365

REACTIVITY
Goat

PRODUCT SYNONYMS

Total Epidermal Growth Factor; Goat Total Epidermal Growth Factor ELISA Kit; EGF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Specificity	This assay has high sensitivity and excellent specificity for detection of EGF. No significant cross-reactivity or interference between EGF and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between EGF and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for EGF elisa kit	Principle of the Assay: EGF ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-EGF antibody and an EGF-HRP conjugate. The assay sample and buffer are incubated together with EGF-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the EGF concentration since EGF from samples and EGF-HRP conjugate compete for the anti-EGF antibody binding site. Since the number of sites is limited, as more sites are occupied by EGF from the sample, fewer sites are left to bind EGF-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The EGF concentration in each sample is interpolated from this standard curve. Intended Uses: This EGF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat EGF. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for EGF elisa kit	Cancer

NCBI AND UNIPROT INFORMATION

NCBI GI #	4503705
NCBI GeneID	2252
NCBI Accession #	NP_002000.1
NCBI GenBank Nucleotide #	NM_002009.3
UniProt Accession #	P21781; Q6FGV5; Q6RK68; Q96FG5
Molecular Weight	22,509 Da
NCBI Official Full Name	fibroblast growth factor 7
NCBI Official Synonym Full Names	fibroblast growth factor 7
NCBI Official Symbol	FGF7
NCBI Official Synonym Symbols	KGF; HBGF-7
NCBI Protein Information	fibroblast growth factor 7; FGF-7; keratinocyte growth factor; heparin-binding growth factor 7
UniProt Protein Name	Fibroblast growth factor 7
UniProt Gene Name	FGF7
UniProt Synonym Gene Names	KGF; FGF-7; HBGF-7
UniProt Entry Name	FGF7_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
