Monkey Contactin 1 ELISA Kit

CATALOG # AAA88511	REACTIVITY Monkey
------------------------------	-----------------------------

PRODUCT SYNONYMS

Contactin 1; Monkey Contactin 1 ELISA Kit; CNTN1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of CNTN1. No significant cross-reactivity or interference between CNTN1 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CNTN1 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CNTN1 elisa kit	Principle of the Assay: CNTN1 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-CNTN1 antibody and an CNTN1-HRP conjugate. The assay sample and buffer are incubated together with CNTN1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CNTN1 concentration since CNTN1 from samples and CNTN1-HRP conjugate compete for the anti-CNTN1 antibody binding site. Since the number of sites is limited, as more sites are occupied by CNTN1 from the sample, fewer sites are left to bind CNTN1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CNTN1 concentration in each sample is interpolated from this standard curve. Intended Uses: This CNTN1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey CNTN1. This ELISA kit for research use only, not for therapeutic or test applications!
