

Porcine Pro-amylin ELISA Kit | Pro-amylin elisa kit

Porcine Pro-amylin ELISA Kit

CATALOG #
AAA88517

REACTIVITY
Porcine

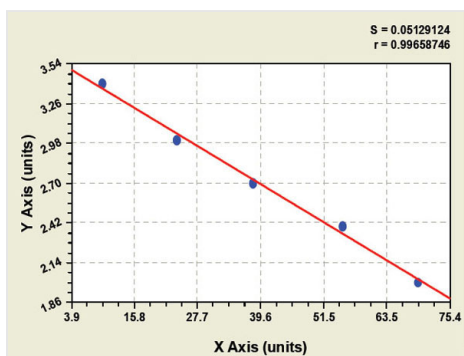

PRODUCT SYNONYMS

Pro-amylin; Porcine Pro-amylin ELISA Kit; Pro-amylin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This Pro-amylin ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine Pro-amylin. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Pro-amylin elisa kit

Principle of the Assay: Pro-amylin ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Pro-amylin antibody and an Pro-amylin-HRP conjugate. The assay sample and buffer are incubated together with Pro-amylin-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Pro-amylin concentration since Pro-amylin from samples and Pro-amylin-HRP conjugate compete for the anti-Pro-amylin antibody binding site. Since the number of sites is limited, as more sites are occupied by Pro-amylin from the sample, fewer sites are left to bind Pro-amylin-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Pro-amylin concentration in each sample is interpolated from this standard curve.

Product Categories/Family for Pro-amylin elisa kit

Cardiovascular

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
