

Rat Soluble Amyloid Precursor Protein beta ELISA Kit | sAPPbeta elisa kit

Rat Soluble Amyloid Precursor Protein beta ELISA Kit

CATALOG # AAA88579	REACTIVITY Rat
------------------------------	--------------------------

PRODUCT SYNONYMS

Soluble Amyloid Precursor Protein beta; Rat Soluble Amyloid Precursor Protein beta ELISA Kit; Rat Soluble Amyloid Precursor Protein b ELISA Kit; sAPPbeta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	5.0-100ng/mL
Sensitivity	1.0ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for sAPPbeta elisa kit	Intended Uses: This SAPPbeta ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat SAPPbeta. This ELISA kit for research use only! Principle of the Assay: SAPPbeta ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for SAPPbeta. Standards or samples are then added to the microtiter plate wells and SAPPbeta if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of SAPPbeta present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for SAPPbeta are added to each well to "sandwich" the SAPPbeta immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain SAPPbeta and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SAPPbeta concentration in each sample is interpolated from this standard curve.
Product Categories/Family for sAPPbeta elisa kit	Neurobiology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
