

Canine Terminal complement complex C5b-9 ELISA Kit | TCC C5b-9 elisa kit

Canine Terminal complement complex C5b-9 ELISA Kit

CATALOG #
AAA88595

REACTIVITY
Canine

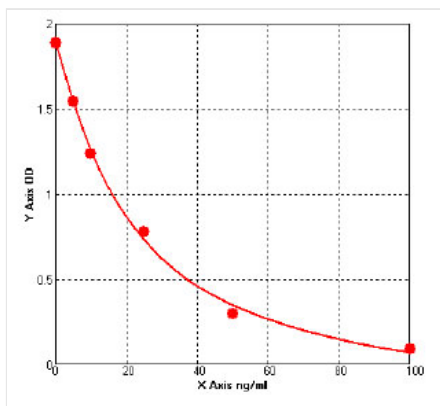

PRODUCT SYNONYMS

Terminal complement complex C5b-9; Canine Terminal complement complex C5b-9 ELISA Kit; TCC C5b-9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of C5b9. No significant cross-reactivity or interference between C5b9 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between C5b9 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Intended Uses	This TCC C5b-9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine TCC C5b-9. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TCC C5b-9 elisa kit	Principle of the Assay: C5b9 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-C5b9 antibody and an C5b9-HRP conjugate. The assay sample and buffer are incubated together with C5b9-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the C5b9 concentration since C5b9 from samples and C5b9-HRP conjugate compete for the anti-C5b9 antibody binding site. Since the number of sites is limited, as more sites are occupied by C5b9 from the sample, fewer sites are left to bind C5b9-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The C5b9 concentration in each sample is interpolated from this standard curve. Intended Uses: This C5b9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine C5b9. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for TCC C5b-9 elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
