

Chicken Vasoactive intestinal peptide ELISA Kit | VIP elisa kit

Chicken Vasoactive intestinal peptide ELISA Kit

CATALOG # AAA88608	REACTIVITY Chicken
------------------------------	------------------------------

PRODUCT SYNONYMS

Vasoactive intestinal peptide; Chicken Vasoactive intestinal peptide ELISA Kit; VIP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This VIP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken VIP. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for VIP elisa kit	Principle of the assay: VIP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-VIP antibody and an VIP-HRP conjugate. The assay sample and buffer are incubated together with VIP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the VIP concentration since VIP from samples and VIP-HRP conjugate compete for the anti-VIP antibody binding site. Since the number of sites is limited, as more sites are occupied by VIP from the sample, fewer sites are left to bind VIP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The VIP concentration in each sample is interpolated from this standard curve.
