

Chicken Basic Fibroblast Growth Factor ELISA Kit | BFGF elisa kit

Chicken Basic Fibroblast Growth Factor ELISA Kit

CATALOG #
AAA88669

REACTIVITY
Chicken

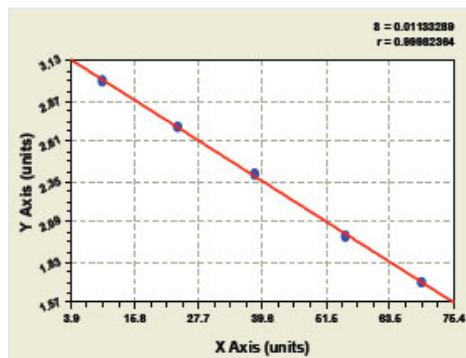

PRODUCT SYNONYMS

Basic Fibroblast Growth Factor; Chicken Basic Fibroblast Growth Factor ELISA Kit; BFGF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Sequence Length	114
Assay Type	Competitive or Sandwich
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL.
Intended Uses	This BFGF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken BFGF. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

Principle of the Assay: BFGF ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-BFGF antibody and an BFGF-HRP conjugate. The assay sample and buffer are incubated together with BFGF-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the BFGF concentration since BFGF from samples and BFGF-HRP conjugate compete for the anti-BFGF antibody binding site. Since the number of sites is limited, as more sites are occupied by BFGF from the sample, fewer sites are left to bind BFGF-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The BFGF concentration in each sample is interpolated from this standard curve.
