

## Monkey Testosterone ELISA Kit | TESTO elisa kit

Monkey Testosterone ELISA Kit

CATALOG #  
**AAA88701**

REACTIVITY  
**Monkey**

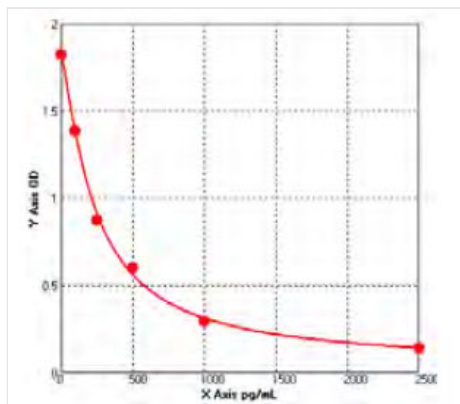

### PRODUCT SYNONYMS

Testosterone; Monkey Testosterone ELISA Kit; TESTO elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Monkey                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of TESTO. No significant cross-reactivity or interference between TESTO and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between TESTO and all the analogues, therefore, cross reaction may still exist in some cases. |
| Assay Type              | Quantitative Competitive                                                                                                                                                                                                                                                                                                                                                                    |
| Samples                 | Serum, plasma, cell culture supernatants, body fluid and tissue homogenate                                                                                                                                                                                                                                                                                                                  |
| Sensitivity             | 1.0 pg/mL                                                                                                                                                                                                                                                                                                                                                                                   |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                                                                                                                                                                                                                                                                                         |

| Related Product Information for TESTO elisa kit | <p>Principle of the Assay: TESTO ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-TESTO antibody and an TESTO-HRP conjugate. The assay sample and buffer are incubated together with TESTO-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TESTO concentration since TESTO from samples and TESTO-HRP conjugate compete for the anti-TESTO antibody binding site. Since the number of sites is limited, as more sites are occupied by TESTO from the sample, fewer sites are left to bind TESTO-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TESTO concentration in each sample is interpolated from this standard curve.</p> <p>Intended Uses: This TESTO ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey TESTO. This ELISA kit for research use only, not for therapeutic or test applications!</p> |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
