

Chicken Hexokinase ELISA Kit | HK elisa kit

Chicken Hexokinase ELISA Kit

CATALOG #
AAA88876

REACTIVITY
Chicken

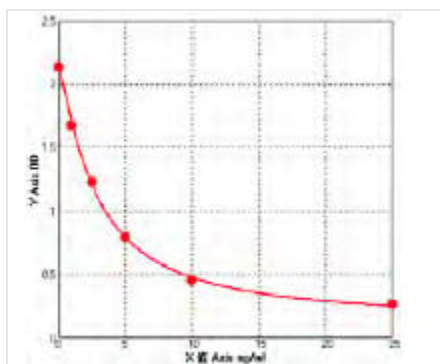

PRODUCT SYNONYMS

Hexokinase; Chicken Hexokinase ELISA Kit; HK elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of HEXK. No significant cross-reactivity or interference between HEXK and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between HEXK and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for HK elisa kit	Intended Uses: This HEXK ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken HEXK. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: HEXK ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-HEXK antibody and an HEXK-HRP conjugate. The assay sample and buffer are incubated together with HEXK-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HEXK concentration since HEXK from samples and HEXK-HRP conjugate compete for the anti-HEXK antibody binding site. Since the number of sites is limited, as more sites are occupied by HEXK from the sample, fewer sites are left to bind HEXK-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HEXK concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15235722
NCBI GeneID	829940
NCBI Accession #	NP_195497.1
NCBI GenBank Nucleotide #	NM_119945.1
NCBI Official Full Name	hexokinase
NCBI Official Symbol	HKL3
NCBI Official Synonym Symbols	hexokinase-like 3; HKL3; T28I19.120; T28I19_120
NCBI Protein Information	hexokinase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
