

Canine Vitamin B6 ELISA Kit | VB6 elisa kit

Canine Vitamin B6 ELISA Kit

CATALOG #
AAA89040

REACTIVITY
Canine

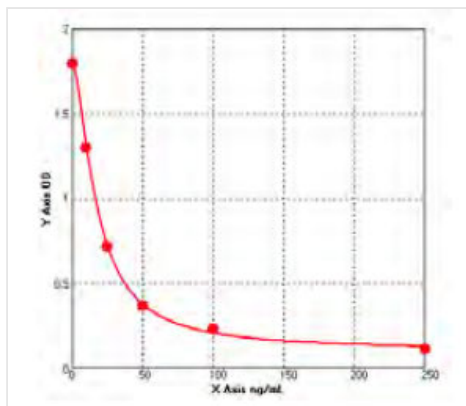

PRODUCT SYNONYMS

Vitamin B6; Canine Vitamin B6 ELISA Kit; VB6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of VB6. No significant cross-reactivity or interference between VB6 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between VB6 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for VB6 elisa kit	Intended Uses: This VB6 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine VB6. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: VB6 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-VB6 antibody and an VB6-HRP conjugate. The assay sample and buffer are incubated together with VB6-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the VB6 concentration since VB6 from samples and VB6-HRP conjugate compete for the anti-VB6 antibody binding site. Since the number of sites is limited, as more sites are occupied by VB6 from the sample, fewer sites are left to bind VB6-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The VB6 concentration in each sample is interpolated from this standard curve.
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
