

Sheep Gastrin-releasing peptide ELISA Kit | GRP elisa kit

Sheep Gastrin-releasing peptide ELISA Kit

CATALOG #
AAA89042

REACTIVITY
Sheep

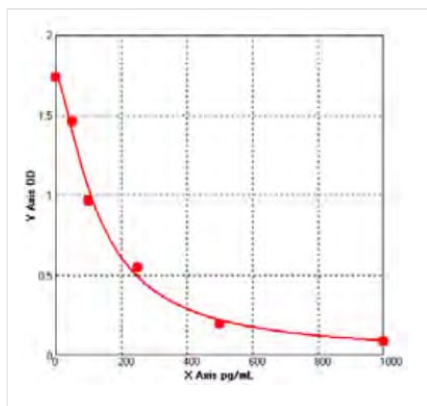

PRODUCT SYNONYMS

Gastrin-releasing peptide; Sheep Gastrin-releasing peptide ELISA Kit; GRP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Specificity	This assay has high sensitivity and excellent specificity for detection of GRP. No significant cross-reactivity or interference between GRP and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GRP and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Intended Uses	This GRP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep GRP. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GRP elisa kit	Principle of the Assay: GRP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GRP antibody and an GRP-HRP conjugate. The assay sample and buffer are incubated together with GRP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GRP concentration since GRP from samples and GRP-HRP conjugate compete for the anti-GRP antibody binding site. Since the number of sites is limited, as more sites are occupied by GRP from the sample, fewer sites are left to bind GRP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GRP concentration in each sample is interpolated from this standard curve. Intended Uses: This GRP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep GRP. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for GRP elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	31542860
NCBI GeneID	2922
NCBI Accession #	NP_002082.2
NCBI GenBank Nucleotide #	NM_002091.3
Molecular Weight	15,533 Da
NCBI Official Full Name	gastrin-releasing peptide isoform 1 preproprotein
NCBI Official Synonym Full Names	gastrin-releasing peptide
NCBI Official Symbol	GRP
NCBI Official Synonym Symbols	BN; GRP-10; proGRP; preproGRP
NCBI Protein Information	gastrin-releasing peptide; bombesin; prepro-GRP; neuromedin C; pre-progastrin releasing peptide
UniProt Protein Name	Gastrin-releasing peptide
UniProt Gene Name	GRP
UniProt Synonym Gene Names	GRP
UniProt Entry Name	GRP_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
