

Porcine Gamma Aminobutyric Acid ELISA Kit | GABA elisa kit

Porcine Gamma Aminobutyric Acid ELISA Kit

CATALOG #
AAA89051

REACTIVITY
Porcine

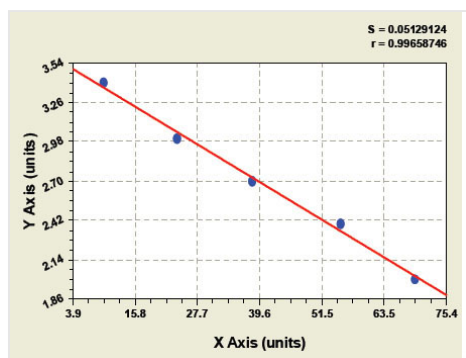

PRODUCT SYNONYMS

Gamma Aminobutyric Acid; Porcine Gamma Aminobutyric Acid ELISA Kit; GABA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This GABA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse GABA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GABA elisa kit

Principle of the Assay: GABA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-GABA antibody and an GABA-HRP conjugate. The assay sample and buffer are incubated together with GABA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GABA concentration since GABA from samples and GABA-HRP conjugate compete for the anti-GABA antibody binding site. Since the number of sites is limited, as more sites are occupied by GABA from the sample, fewer sites are left to bind GABA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GABA concentration in each sample is interpolated from this standard curve.

Neurobiology

NCBI AND UNIPROT INFORMATION

NCBI GI #	60654715
NCBI Official Full Name	gamma-aminobutyric acid

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
