

Goat Glucocorticoid receptor-alpha ELISA Kit | GR-alpha elisa kit

Goat Glucocorticoid receptor-alpha ELISA Kit

CATALOG #
AAA89105

REACTIVITY
Goat

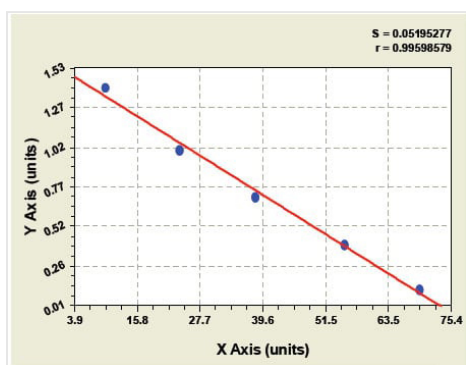

PRODUCT SYNONYMS

Glucocorticoid receptor-alpha; Goat Glucocorticoid receptor-alpha ELISA Kit; Goat Glucocorticoid receptor-a ELISA Kit; GR-alpha elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GR-alpha elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This GR-? ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat GR-?. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY GR-? ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-GR-? antibody and an GR-?-HRP conjugate. The assay sample and buffer are incubated together with GR-?-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GR-? concentration since GR-? from samples and GR-?-HRP conjugate compete for the anti-GR-? antibody binding site. Since the number of sites is limited, as more sites are occupied by GR-? from the sample, fewer sites are left to bind GR-?-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GR-? concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4504133
NCBI GeneID	2908
NCBI Accession #	NP_000167.1
NCBI GenBank Nucleotide #	NM_000176.2
NCBI Official Full Name	glucocorticoid receptor isoform alpha

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
