

Chicken Leukotriene B4 ELISA Kit | LTB4 elisa kit

Chicken Leukotriene B4 ELISA Kit

CATALOG #
AAA89120

REACTIVITY
Chicken

PRODUCT SYNONYMS

Leukotriene B4; Chicken Leukotriene B4 ELISA Kit; LTB4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This LTB4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken LTB4. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for LTB4 elisa kit

Principle of the Assay: LTB4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-LTB4 antibody and an LTB4-HRP conjugate. The assay sample and buffer are incubated together with LTB4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LTB4 concentration since LTB4 from samples and LTB4-HRP conjugate compete for the anti-LTB4 antibody binding site. Since the number of sites is limited, as more sites are occupied by LTB4 from the sample, fewer sites are left to bind LTB4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LTB4 concentration in each sample is interpolated from this standard curve.

Product Categories/Family for LTB4 elisa kit

Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
