

Porcine Liver Fatty acid Binding Protein ELISA Kit | L.FABP elisa kit

Porcine Liver Fatty acid Binding Protein ELISA Kit

CATALOG #
AAA89124

REACTIVITY
Porcine

PRODUCT SYNONYMS

Liver Fatty acid Binding Protein; Porcine Liver Fatty acid Binding Protein ELISA Kit; L.FABP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Specificity	This assay has high sensitivity and excellent specificity for detection of L-FABP. No significant cross-reactivity or interference between L-FABP and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between L-FABP and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for L.FABP elisa kit	Principle of the Assay: L-FABP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-L-FABP antibody and an L-FABP-HRP conjugate. The assay sample and buffer are incubated together with L-FABP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the L-FABP concentration since L-FABP from samples and L-FABP-HRP conjugate compete for the anti-L-FABP antibody binding site. Since the number of sites is limited, as more sites are occupied by L-FABP from the sample, fewer sites are left to bind L-FABP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The L-FABP concentration in each sample is interpolated from this standard curve. Intended Uses: This L-FABP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine L-FABP. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for L.FABP elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	204086
NCBI GeneID	24360
Molecular Weight	14,273 Da
NCBI Official Full Name	liver fatty acid binding protein
NCBI Official Synonym Full Names	fatty acid binding protein 1, liver
NCBI Official Symbol	Fabp1
NCBI Official Synonym Symbols	SCP; p14; SCP.; Fabplg; L-FABP
NCBI Protein Information	fatty acid-binding protein, liver; Z-protein; squalene- and sterol-carrier protein; liver-type fatty acid-binding protein
UniProt Protein Name	Fatty acid-binding protein, liver
UniProt Gene Name	Fabp1
UniProt Synonym Gene Names	L-FABP; SCP
UniProt Entry Name	FABPL_RAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
