

Chicken Lipoprotein a ELISA Kit | Lp-a elisa kit

Chicken Lipoprotein a ELISA Kit

CATALOG #
AAA89203

REACTIVITY
Chicken

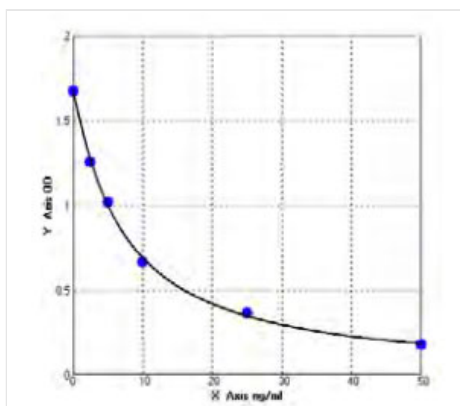

PRODUCT SYNONYMS

Lipoprotein a; Chicken Lipoprotein a ELISA Kit; Lp-a elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of LPA. No significant cross-reactivity or interference between LPA and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between LPA and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Lp-a elisa kit	Principle of the Assay: LPA ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-LPA antibody and an LPA-HRP conjugate. The assay sample and buffer are incubated together with LPA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LPA concentration since LPA from samples and LPA-HRP conjugate compete for the anti-LPA antibody binding site. Since the number of sites is limited, as more sites are occupied by LPA from the sample, fewer sites are left to bind LPA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LPA concentration in each sample is interpolated from this standard curve. Intended Uses: This LPA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken LPA. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for Lp-a elisa kit	Cardiovascular

NCBI AND UNIPROT INFORMATION

NCBI GI #	317123117
NCBI GeneID	10082719
NCBI Accession #	YP_004103120.1
NCBI GenBank Nucleotide #	NC_014831.1
NCBI Official Full Name	lipoprotein A
NCBI Official Symbol	Tmar_2316
NCBI Protein Information	lipoprotein A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
