

Monkey Tartrate resistant acid phosphatase 5b ELISA Kit | TRACP-5b elisa kit

Monkey Tartrate resistant acid phosphatase 5b ELISA Kit

CATALOG #
AAA89231

REACTIVITY
Monkey

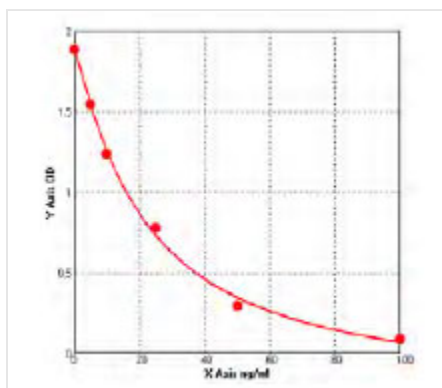

PRODUCT SYNONYMS

Tartrate resistant acid phosphatase 5b; Monkey Tartrate resistant acid phosphatase 5b ELISA Kit; TRACP-5b elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for TRACP-5b elisa kit

Intended Uses: This TRACP5b ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey TRACP5b. This ELISA kit for research use only!

Principle of the Assay: TRACP5bELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-TRACP5bantibody and an TRACP5b-HRP conjugate. The assay sample and buffer are incubated together with TRACP5b-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TRACP5bconcentration since TRACP5bfrom samples and TRACP5b-HRP conjugate compete for the anti-TRACP5bantibody binding site. Since the number of sites is limited, as more sites are occupied by TRACP5bfrom the sample, fewer sites are left to bind TRACP5b-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TRACP5bconcentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
