

Chicken Hyaluronate binding protein ELISA Kit | HABP elisa kit

Chicken Hyaluronate binding protein ELISA Kit

CATALOG #
AAA89300

REACTIVITY
Chicken

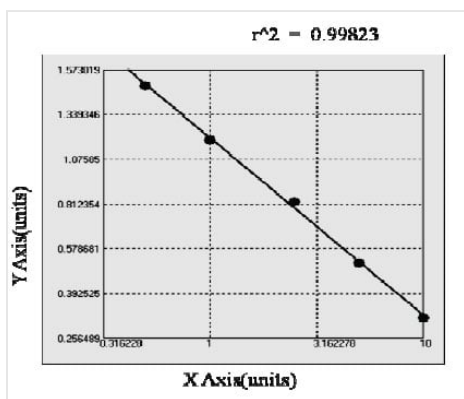

PRODUCT SYNONYMS

Hyaluronate binding protein; Chicken Hyaluronate binding protein ELISA Kit; HABP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This HABP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken HABP. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for HABP elisa kit

Principle of the Assay: HABP ELISAKit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-HABP antibody and an HABP-HRP conjugate. The assay sample and buffer are incubated together with HABP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HABP concentration since HABP from samples and HABP-HRP conjugate compete for the anti-HABP antibody binding site. Since the number of sites is limited, as more sites are occupied by HABP from the sample, fewer sites are left to bind HABP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HABP concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2136764
NCBI Official Full Name	hyaluronate-binding protein - bovine (fragments)

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
