

Sheep Cyclosporine A ELISA Kit | CsA elisa kit

Sheep Cyclosporine A ELISA Kit

CATALOG #
AAA89403

REACTIVITY
Sheep

PRODUCT SYNONYMS

Cyclosporine A; Sheep Cyclosporine A ELISA Kit; CsA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Intended Uses	This CsA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep CsA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CsA elisa kit

Principle of the Assay: CsA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CsA antibody and an CsA-HRP conjugate. The assay sample and buffer are incubated together with CsA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CsA concentration since CsA from samples and CsA-HRP conjugate compete for the anti-CsA antibody binding site. Since the number of sites is limited, as more sites are occupied by CsA from the sample, fewer sites are left to bind CsA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CsA concentration in each sample is interpolated from this standard curve.

Product Categories/Family for CsA elisa kit

Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
