

Mouse Glucagon Like Peptide 2 ELISA Kit | GLP-2 elisa kit

Mouse Glucagon Like Peptide 2 ELISA Kit

CATALOG #
AAA89485

REACTIVITY
Mouse

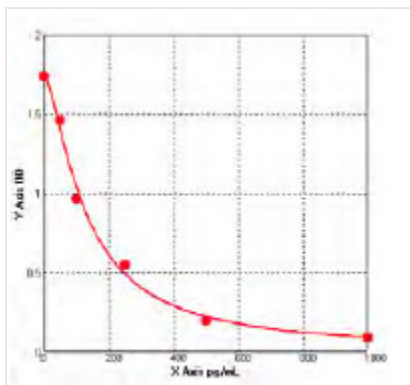

PRODUCT SYNONYMS

Glucagon Like Peptide 2; Mouse Glucagon Like Peptide 2 ELISA Kit; GLP-2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of GLP2. No significant cross-reactivity or interference between GLP2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GLP2 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GLP-2 elisa kit	Intended Uses: This GLP2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse GLP2. This ELISA kit for research use only! Principle of the Assay: GLP2 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-GLP2 antibody and an GLP2-HRP conjugate. The assay sample and buffer are incubated together with GLP2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GLP2 concentration since GLP2 from samples and GLP2-HRP conjugate compete for the anti-GLP2 antibody binding site. Since the number of sites is limited, as more sites are occupied by GLP2 from the sample, fewer sites are left to bind GLP2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GLP2 concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4503945
NCBI GeneID	2641
NCBI Accession #	NP_002045.1
NCBI GenBank Nucleotide #	NM_002054.4
Molecular Weight	20,909 Da
NCBI Official Full Name	glucagon preproprotein
NCBI Official Synonym Full Names	glucagon
NCBI Official Symbol	GCG
NCBI Official Synonym Symbols	GLP1; GLP2; GRPP
NCBI Protein Information	glucagon; preproglucagon; glucagon-like peptide 1; glucagon-like peptide 2; glicentin-related polypeptide
UniProt Protein Name	Glucagon
UniProt Gene Name	GCG
UniProt Synonym Gene Names	GRPP; OXM; OXY; GLP-1; GLP-1(7-37); GLP-1(7-36); GLP-2
UniProt Entry Name	GLUC_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
