

Monkey Secretory Immunoglobulin A ELISA Kit | SIgA elisa kit

Monkey Secretory Immunoglobulin A ELISA Kit

CATALOG #
AAA89747

REACTIVITY
Monkey

PRODUCT SYNONYMS

Secretory Immunoglobulin A; Monkey Secretory Immunoglobulin A ELISA Kit; SIgA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	5.0-100mg/mL
Sensitivity	1.0mg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SIgA elisa kit	For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate INTENDED USE This SIgA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey SIgA. This ELISA kit for research use only! PRINCIPLE OF THE ASSAY SIgA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-sIgA antibody and an SIgA-HRP conjugate. The assay sample and buffer are incubated together with SIgA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SIgA concentration since SIgA from samples and SIgA-HRP conjugate compete for the anti-sIgA antibody binding site. Since the number of sites is limited, as more sites are occupied by SIgA from the sample, fewer sites are left to bind SIgA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SIgA concentration in each sample is interpolated from this standard curve.
Product Categories/Family for SIgA elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
