

Rabbit Citrulline ELISA Kit | Cit elisa kit

Rabbit Citrulline ELISA Kit

CATALOG #
AAA89779

REACTIVITY
Rabbit

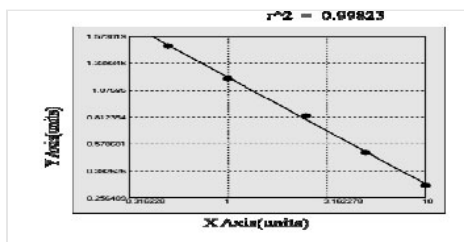

PRODUCT SYNONYMS

Citrulline; Rabbit Citrulline ELISA Kit; Cit elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	2.5-50 pmol/mL
Sensitivity	1.0pmol/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Cit elisa kit

Intended Uses: This CIT ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit CIT. This ELISA kit for research use only!

Principle of the Assay: CIT ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CIT antibody and an CIT-HRP conjugate. The assay sample and buffer are incubated together with CIT-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CIT concentration since CIT from samples and CIT-HRP conjugate compete for the anti-CIT antibody binding site. Since the number of sites is limited, as more sites are occupied by CIT from the sample, fewer sites are left to bind CIT-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CIT concentration in each sample is interpolated from this standard curve.
