

Bovine Tissue factor pathway inhibitor ELISA Kit | TFPI elisa kit

Bovine Tissue factor pathway inhibitor ELISA Kit

CATALOG #
AAA89820

REACTIVITY
Bovine

PRODUCT SYNONYMS

Tissue factor pathway inhibitor; Bovine Tissue factor pathway inhibitor ELISA Kit; TFPI elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TFPI ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine TFPI. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the Assay: TFPI ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TFPI antibody and an TFPI-HRP conjugate. The assay sample and buffer are incubated together with TFPI-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TFPI concentration since TFPI from samples and TFPI-HRP conjugate compete for the anti-TFPI antibody binding site. Since the number of sites is limited, as more sites are occupied by TFPI from the sample, fewer sites are left to bind TFPI-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TFPI concentration in each sample is interpolated from this standard curve.
