

Sheep E3 Estriol ELISA Kit | E3 elisa kit

Sheep E3 Estriol ELISA Kit

CATALOG #
AAA89837

REACTIVITY
Sheep

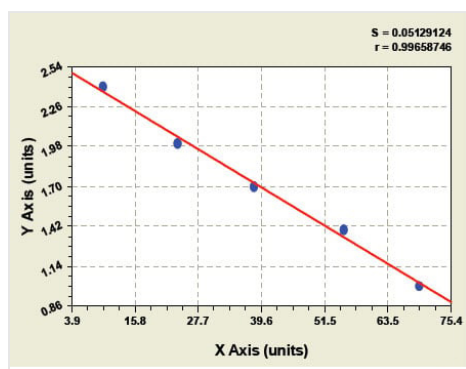

PRODUCT SYNONYMS

E3 Estriol; Sheep E3 Estriol ELISA Kit; E3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for E3 elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This E3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep E3. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY E3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-E3 antibody and an E3-HRP conjugate. The assay sample and buffer are incubated together with E3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the E3 concentration since E3 from samples and E3-HRP conjugate compete for the anti-E3 antibody binding site. Since the number of sites is limited, as more sites are occupied by E3 from the sample, fewer sites are left to bind E3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The E3 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
