

Chicken Soluble tumor necrosis factor-related apoptosis inducing ligand ELISA Kit

Chicken Soluble tumor necrosis factor-related apoptosis inducing ligand ELISA Kit

CATALOG #
AAA89912

REACTIVITY
Chicken

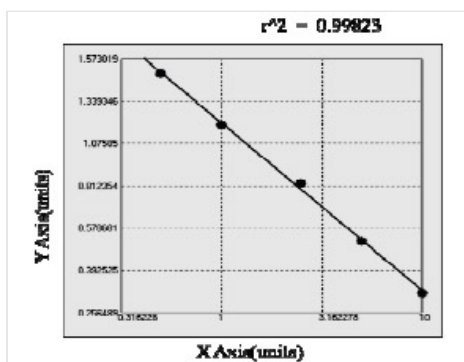

PRODUCT SYNONYMS

Soluble tumor necrosis factor-related apoptosis inducing ligand; Chicken Soluble tumor necrosis factor-related apoptosis inducing ligand ELISA Kit; Soluble tumor necrosis factor-related apoptosis inducing ligand elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Soluble tumor necrosis factor-related apoptosis inducing ligand elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This Strail ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken Strail. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY Strail ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Strail antibody and an Strail-HRP conjugate. The assay sample and buffer are incubated together with Strail-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Strail concentration since Strail from samples and Strail-HRP conjugate compete for the anti-Strail antibody binding site. Since the number of sites is limited, as more sites are occupied by Strail from the sample, fewer sites are left to bind Strail-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Strail concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
