

Sheep Regenerating gene IV ELISA Kit | REG-4 elisa kit

Sheep Regenerating gene IV ELISA Kit

CATALOG #
AAA90339

REACTIVITY
Sheep

PRODUCT SYNONYMS

Regenerating gene IV; Sheep Regenerating gene IV ELISA Kit; REG-4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This REG-4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep REG-4. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for REG-4 elisa kit

Principle of the Assay: REG-4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-REG-4 antibody and an REG-4-HRP conjugate. The assay sample and buffer are incubated together with REG-4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the REG-4 concentration since REG-4 from samples and REG-4-HRP conjugate compete for the anti-REG-4 antibody binding site. Since the number of sites is limited, as more sites are occupied by REG-4 from the sample, fewer sites are left to bind REG-4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The REG-4 concentration in each sample is interpolated from this standard curve.

Product Categories/Family for REG-4 elisa kit

Cardiovascular

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
