

Goat Adrenomedullin ELISA Kit | AM elisa kit

Goat Adrenomedullin ELISA Kit

CATALOG #
AAA90427

REACTIVITY
Goat

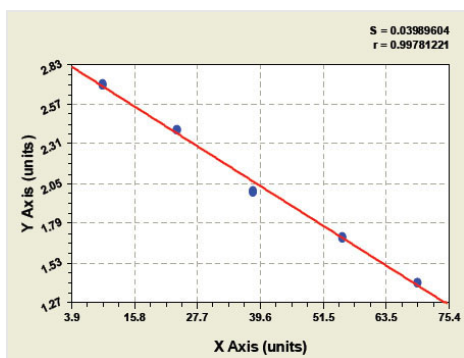

PRODUCT SYNONYMS

Adrenomedullin; Goat Adrenomedullin ELISA Kit; AM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1ng/mL.
Intended Uses	This AM ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat AM. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for AM elisa kit

Principle of the Assay: AM ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-AM antibody and an AM-HRP conjugate. The assay sample and buffer are incubated together with AM-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the AM concentration since AM from samples and AM-HRP conjugate compete for the anti-AM antibody binding site. Since the number of sites is limited, as more sites are occupied by AM from the sample, fewer sites are left to bind AM-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The AM concentration in each sample is interpolated from this standard curve.

Product Categories/Family for AM elisa kit

Neurobiology

NCBI AND UNIPROT INFORMATION

NCBI GI #	194105206
Molecular Weight	47,692 Da
NCBI Official Full Name	amd
UniProt Protein Name	Amd
UniProt Gene Name	amd
UniProt Synonym Gene Names	Dperamd; Dper_GL21130; GL21130
UniProt Entry Name	B4GXD8_DROPE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
