

Canine Tartrate resistant acid phosphatase 5b ELISA Kit | TRACP-5b elisa kit

Canine Tartrate resistant acid phosphatase 5b ELISA Kit

CATALOG #
AAA90513

REACTIVITY
Canine

PRODUCT SYNONYMS

Tartrate resistant acid phosphatase 5b; Canine Tartrate resistant acid phosphatase 5b ELISA Kit; TRACP-5b elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TRACP-5b elisa kit

Intended Uses: This TRACP5B ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine TRACP5B. This ELISA kit for research use only!

Principle of the Assay: TRACP5B ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TRACP5B antibody and an TRACP5B-HRP conjugate. The assay sample and buffer are incubated together with TRACP5B-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TRACP5B concentration since TRACP5B from samples and TRACP5B-HRP conjugate compete for the anti-TRACP5B antibody binding site. Since the number of sites is limited, as more sites are occupied by TRACP5B from the sample, fewer sites are left to bind TRACP5B-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TRACP5B concentration in each sample is interpolated from this standard curve.

Signal Transduction

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
